

Let Students Pose the Problems: Active Learning with Math^oCityMap

Invitation to participate in our online teacher training

-  You have already used the MathCityMap system with your students, but would like to involve them more actively in outdoor mathematics?
-  In the context of the Erasmus+ project MATRIX, we happily invite teachers of all educational levels to participate in our online teacher training on problem posing with MathCityMap!
-  In a 90-minute Zoom call, you will get to know the idea of problem posing as well as a hands-on introduction to the student account feature of MathCityMap including students' & teachers' view as well as peer review. We will discuss the implementation in mathematics lessons and exchange your ideas on an international level!

The contents were developed in the Erasmus+ project MATRIX (www.matrix-project.eu) coordinated by Goethe University Frankfurt.

March, 10, 2026
15.30-17.00

Flexible participation
via Zoom

Register until
March 2nd 2026
